

presents

Hands-on Geometry (in-school fieldtrip) *for* Kindergarten

Introduction to Shapes

Students will

- Learn about several types of 2- and 3-dimensional shapes
- Build and analyse various shapes
- Construct objects using a combination of basic and complex shapes as base features.
- Investigate the difference between shapes
- Work in teams on a shape-based structural challenge

Alignment with County Curriculum for Kindergarten

- Mathematics
- Geometry: Shape identification, description and modelling
- Synthesis
- Using basic shapes to construct a whole object
- Originality
- Creating new object using known shapes
